2631

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on May 1, 2002
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above, claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
*See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s). 4-5 6) ☐ Other:

Art Unit: 2631

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Krasner (US 6,133,871).

Regarding claims 1 and 6, Krasner discloses a GPS receiver in figure 1A with a GPS antenna 40, a receiver front end 42, an analog to digital converter 44 and a digital snapshot memory 46 for storing a portion of the signal. Figure 3 discloses a flow chart of the invention of Krasner. After the portion of the signal is stored 104, an FFT process is initiated 112, the result is multiplied by a PN code 114. These code sequences belong to a family known as Gold codes (column 2, lines 1-9). An inverse FFT process is conducted 118 and a peak of the convolution is found 126.

Art Unit: 2631

Regarding claim 2, the peak detector attempts to refine the estimate of the peak value (column 14, line 66 to column 15, line 17).

Regarding claims 3 and 8, the Gold code is precomputed and stored in memory (column 2, lines 10-15).

Regarding claim 4, Krasner further discloses adjusting the carrier frequency to improve the phase estimate (column 2, lines 43-49).

Regarding claims 5 and 7, Krasner further discloses time shifting the signal for d seconds which is equivalent to multiplying the Fourier Transform (column 14, lines 30-46).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krasner (US 6,133,871).

Regarding claims 9 and 14, Krasner discloses a GPS receiver in figure 1A with a GPS antenna 40, a receiver front end 42, an analog to digital converter 44 and a digital snapshot memory 46 for storing a portion of the signal. Figure 3 discloses a flow chart

Art Unit: 2631

of the invention of Krasner. After the portion of the signal is stored 104, an FFT process is initiated 112, the result is multiplied by a PN code 114. These code sequences belong to a family known as Gold codes (column 2, lines 1-9). An inverse FFT process is conducted 118 and a peak of the convolution is found 126. Krasner does not disclose the snap shot memory stored only one millisecond of the received signal. Krasner discloses storing typically 100 to 1000 frames corresponding to a duration of 100 msec to 1 second duration (column 12, lines 8-15). Krasner also discloses this is only a typical amount and the invention can operate when a "sufficient amount" of data has been collected. It would have been obvious for one of ordinary skill in the art to use the minimal amount of this data which still satisfies the "sufficient amount" limitation to operate the system. One millisecond would correspond to one frame and is the absolute minimum which could be used. By using the minimum number of frames, the size of the snap shot memory could be reduced and thereby reducing the cost of the receiver.

Regarding claims 10, 15 and 17-20, the peak detector attempts to refine the estimate of the peak value (column 14, line 66 to column 15, line 17).

Regarding claims 11 and 16, the Gold code is precomputed and stored in memory (column 2, lines 10-15).

Regarding claim 12, Krasner further discloses adjusting the carrier frequency to improve the phase estimate (column 2, lines 43-49).

Art Unit: 2631

Regarding claim 13, Krasner further discloses time shifting the signal for d seconds which is equivalent to multiplying the Fourier Transform (column 14, lines 30-46).

Conclusion

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to:

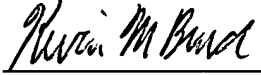

(703) 872-9314, (for formal communications intended for entry or for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA., Sixth Floor (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Burd, whose telephone number is (703) 308-7034. The Examiner can normally be reached on Monday-Thursday from 9:00 AM - 5:00 PM. The examiner can also be reached on alternate Friday.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-3800.
